## TREND EDITION

- **Protects against negative external environmental influences**
- **Strengthens the skin's microbiome**
- **Protects against digital ageing**
- **Stabilises the skin's immune cells**
- **Provides moisture**
- **Reduces irritation**
- **Silky texture**

### Application at home

Gently massage into the skin after cleansing in the morning and/or evening. Apply to the face, neck and décolletage. Let the serum soak in and then apply your usual day or night cream. We recommend following with the PROBIOTICS Anti-Pollution Cream in the morning and/or evening for a particularly effective skincare routine.

**Tip:** PROBIOTICS Pro-Immune Serum is the ideal supplement to PROBIOTICS Anti-Pollution Cream, but it can also be used in combination with any other moisturising cream. In summer or when there is increased UV radiation, it can be combined with Face Guard Advanced. We recommend that you apply the products as follows:

1. Face Guard Advanced
2. PROBIOTICS Pro-Immune Serum
3. PROBIOTICS Anti-Pollution Cream

## ACTIVE INGREDIENTS

- **Probiotic:** made from lactic acid bacteria; strengthens the skin's defence mechanisms against pathogenic germs; supports the skin's barrier function; reduces dryness and irritation; can significantly reduce transepidermal water loss (TEWL) after just 7 days
- **Microalgae extract:** is activated by blue light (HEV= High Energy Visible Light; significantly reduces the signs of digital ageing after just 10 days: Radiance +5%; Wrinkle depth -16%; Firmness +4%
- **Beta-glucan:** natural polysaccharide; stimulates the skin's own immune system; increases skin's resistance
- **Ectoin®:** protects the Langerhans cells located in the skin ("guardians" of the immune system)
- **Saccharide isomerate:** a skin-identical carbohydrate complex for long-lasting hydration of the skin
- **Long- and short-chained hyaluronic acids:** provides long-lasting moisture
- **Allantoin:** soothing; helps alleviate redness
- **Bisabolol:** soothing; helps alleviate redness
- **Vitamin E:** neutralises the free radicals that cause cell damage
