

- Deeply cleanses the pores
- Frees the skin from toxins
- Clears up the skin
- Refines the complexion
- Invigorates the skin

## Application

Black Detox Bubble Mask is suitable for any skin that needs to be freed from environmental toxins and impurities.

1. Open the sachet, carefully unfold the mask and place it on the face.
2. Leave the mask to foam for up to ten minutes. Then leave it on the skin for another five to ten minutes.
3. Remove the mask, massage the remaining foam into the skin and use a warm compress to rinse off.

## Black Detox Bubble Mask

### DETOXING AND EXFOLIATING DETOX MASK

Black Detox Bubble Mask is an innovative bubble sheet mask that cleanses the skin deep down into the pores and frees it from toxins thanks to active charcoal from Japan, fruit acids and oxygen. It is perfect as part of a detox treatment and for anyone who struggles with large pores, excessive sebum production, blackheads and impurities.

This black sheet mask is made of organic cellulose and active charcoal from Japan (Binchotan). It is soaked in a serum made from stabilised oxygen and fruit acids. The oxygen is released on contact with the skin, creating a delicate lather. This reaction provides an intense supply of oxygen to the skin, which helps activate the skin's metabolism, which in turn is important for skin that is healthy and glowing. At the same time the fruit acids contained in the product (glycolic acid, citric acid, malic acid and tartaric acid) gently exfoliate the skin's surface by removing dead skin cells and making way for skin renewal.

The sheet mask is perfectly adapted to the facial contours and leaves the skin with a refreshed, silky smooth complexion that has been cleansed to the pore.

### ACTIVE SUBSTANCES

- **Organic cellulose:** Cellulose that has been manufactured biotechnically and features very fine fibres as well as a unique web structure. It moisturises the skin while at the same time providing it with serum and active ingredients
- **Binchotan:** Active charcoal that is derived from the Japanese black oak that is highly absorbing and frees the skin from excess sebum as well as toxins
- **AHA complex:** Fruit acids from sugar cane, maple sugar, lemons and limes contribute to a gentle exfoliation and to skin renewal
- **Neroli extract:** Has a calming and anti-inflammatory effect
- **Organic fluorine:** Oxygen carrier
