## PLATINUM CARE

- **Makes tired eyes shine again**
- **Smooths eye contours**
- **Dark circles appear reduced**
- **Combats puffiness**
- **Sumptuous active ingredients for a unique recipe**

### Application

Spread Eye Cream gently around the eye area in the morning and evening.

## Eye Cream

### PREMIUM ANTI-AGING EYE CREAM

The Premium Anti-Aging Eye Cream provides the eye area with highly-active anti-aging active ingredients around the clock. The Platinum-MP-Complex –a combination of colloidal platinum, Matrixyl™ Synthe'6™ and silk acacia extract –comprehensively improves the skin's structures and enhances tone.

Colloidal platinum visibly refreshes and relaxes the skin straight away. Matrixyl™ Synthe'6™ is an innovative peptide proven to fill lines. The highly-effective peptide stimulates the synthesis of six key skin building blocks (collagen I, III and IV, fibronectin, hyaluronic acid and laminine-5). Crows' feet are reduced effectively. Silk acacia extract protects and repairs damaged collagen fibres through glycation and supports the skin's own special detoxifying systems.

The Sensitive Complex with broom extract, Centella asiatica and liquorice extract it also contains increases the microcirculation in the skin and combats dark circles and puffiness.

The silky-smooth texture is ideal for use every morning and evening. In the morning, the Eye Cream magics away fatigue and gives the face fresh radiance. In the evening, it supports the regeneration of the sensitive eye area and prevents premature aging.

The result is a fresh, alert look, greater radiance, more moisture, reduced dark circles, less puffiness and fewer lines.

### ACTIVE SUBSTANCES

- **Platinum-MP-Complex:**
  - **Colloidal platinum:** Makes the skin feel noticeably better straight away
  - **Matrixyl™ Synthe'6™ (palmitoyl tripeptide-38):** Highly-effective anti-wrinkle active ingredient, smooths lines and wrinkles
  - **Silk acacia extract:** Extract from the bark of the Persian silk acacia (Albizia julibrissin), helps against signs of skin fatigue (e.g. dull complexion, haggard facial skin)
- **Cupuacu butter:** Sumptuous lipid soothes the sensitive eye area
- **Macadamia nut oil:** Supports the protective barrier of the epidermal horny layer and makes the skin more supple
- **Vitamin E acetate:** Is converted to free vitamin E in the skin and neutralises damaging free radicals
