TREND EDITION

- **Protects against negative external environmental influences**
- **Strengthens the skin's microbiome**
- **Protects against digital ageing**
- **Provides the skin with long-lasting hydration**
- **Reduces fine lines and wrinkles**
- **Reduces irritation**
- **Immediately noticeable suppleness and smoothness**

PROBIOTICS Anti-Pollution Cream

PROTECTIVE 24-HOUR CARE FOR ENVIRONMENTALLY STRESSED SKIN

PROBIOTICS Anti-Pollution Cream provides round-the-clock care for irritated skin stressed by everyday environmental influences. The rich formula contains active ingredients that protect the skin from air pollution and blue light damage.

The key ingredient in this unique formula is an innovative probiotic that has been proven to improve skin resistance and strengthen the skin barrier. This probiotic helps balance the microbiome and reduce irritation and damage caused by fine dust and other environmental stressors. The innovative microalgae extract counteracts digital skin ageing caused by blue light. The extract is activated by the high-energy rays and starts its effective anti-ageing process. Red camellia extract reduces the negative effects of air pollution thanks to its powerful antioxidative effect. It reduces wrinkles and improves the skin's density and moisture content. Short- and long-chain hyaluronic acid plumps out fine lines and wrinkles, while Vitamin E neutralises free radicals and precious shea butter nourishes the skin.

PROBIOTICS Anti-Pollution Cream is suitable for all skin types. With regular use, the skin appears more balanced, even and smooth. Ideal for use in combination with the PROBIOTICS Pro-Immune Serum.

Application at home

Apply PROBIOTICS Anti-Pollution Cream regularly to the face and décolletage in the morning and/or evening after cleansing and gently massage in. Ideally, apply PROBIOTICS Pro-Immune Serum beforehand.

Tip: PROBIOTICS Anti-Pollution Cream is the ideal complement to our Probiotic Immune Serum. We recommend using in combination with Face Guard Advanced if you have particularly sensitive skin or if there is increased UV radiation. We recommend that you apply the products as follows:

1. Face Guard Advanced
2. PROBIOTICS Pro-Immune Serum
3. PROBIOTICS Anti-Pollution Cream

ACTIVE INGREDIENTS

- **Probiotic:** made from lactic acid bacteria; balances the microbiome of the skin, which can be derailed by negative environmental influences, and strengthens the skin's barrier function; reduces dryness and irritation; can significantly reduce transepidermal water loss (TEWL) after just 7 days
- **Microalgae extract:** is activated by blue light radiation (HEV = High Energy Visible Light; significantly reduces the signs of digital ageing after just 10 days: Radiance +5%; Wrinkle depth -16%; Firmness +4%
- **Red Camellia Extract:** extract from Camellia japonica, a plant with red flowers native to Japan and Korea; has an antioxidative effect, reduces wrinkles, improves skin density and moisture; good anti-ageing effect against damage caused by fine dust
- **Long- and short-chained hyaluronic acids:** provides long-lasting moisture
- **Saccharide isomerate:** a skin-identical carbohydrate complex for long-lasting hydration of the skin
- **Vitamin E:** neutralises the free radicals that cause cell damage
- **Shea Butter:** leaves skin smooth and supple
