JANSSEN COSMETICS

OILY SKIN

- **First step in the OILY SKIN skincare system for oily, blemished skin**
- **Creamy consistency**
- **For clear and pure skin**
- **Pore-refining**

Application at home

For thorough skin cleansing, generously apply AHA + BHA Cleanser to the face, neck and neckline and gently massage in. Remove any residue with compresses at a comfortable temperature.

Heads up:

pH value of 4.2

Do not leave on the skin for more than 3-5 minutes.

Do not apply to eyes or mucous membranes.

■ AHA + BHA Cleanser

CLEANING EMULSION WITH AHA & BHA

AHA + BHA Cleanser is a cleansing milk for oily, blemish-prone skin. The formula contains fruit acids to thoroughly remove dirt, make-up and dead skin cells from the skin. It leaves the skin feeling pleasantly clean and supple.

AHA + BHA Cleanser contains a combination of the alpha hydroxy acids glycolic, malic, citric and tartaric acid and the beta hydroxy acid salicylic acid. The fruit acids or AHAs dissolve dead skin cells and open up clogged pores. This allows the sebum to drain more easily. This counteracts the formation of blemishes and pimples. Salicylic acid can also loosen excessive cornification but also has an antimicrobial and anti-inflammatory effect.

With regular use, we can improve the texture of the skin significantly.

We recommend AHA + BHA Cleanser for acne oleosa especially.

💧 ACTIVE INGREDIENTS

Mixture of fruit acids identical to those found in nature:

- **AHA fruit acid complex:** Consisting of glycolic, malic, citric and tartaric acids, the formula gently and safely dissolves excess cornification of the skin (keratolytic effect) and stimulates cell proliferation
- **BHA salicylic acid:** Salicylic acid is a naturally occurring active ingredient with antimicrobial and anti-inflammatory properties. In addition, excessive cornification is loosened
