- **Reduces the external appearance of cellulite**
- **Promotes skin firmness**
- **Makes problem areas appear slimmer**
- **Pleasantly light texture, absorbs quickly into the skin**
- **Ideal as part of the CONTOURING treatment**

Body Toning Elixir

BODY SERUM FOR PROBLEM AREAS

Body Toning Elixir is an active ingredient serum for the targeted treatment of problem areas. The power elixir contains toning plant extracts, algae and essential oils that support reducing fat deposits and improve the appearance of cellulite. Recent studies show that caffeine, in particular, has been proven to fight cellulite and melt fat cells. The light oil texture melts into the skin, making it supple and giving it a more even appearance. The concentrate is ideally suited as an effective serum for the **CONTOURING** treatment.

Application in the cabin

The active ingredient serum supports the treatment of problem areas. Treat thighs, hips, abdomen, as well as the inside of the arms particularly intensively.

After applying the active ingredient enhancer, Body Toning Modelage, Body Toning Elixir is applied to the areas to be treated. The effect is intensified by massaging with Grape Seed Massage Oil.

Note: Avoid contact with the eyes and mucous membranes. Please do not use after depilation.

ACTIVE INGREDIENTS

- **Caffeine:** Has been proven to have a slimming, detoxifying, stimulating effect and can reduce cellulite
- **Green tea:** Contains polyphenols and tannin; known for its anti-oxidant effect, reduces free radicals. Its high caffeine concentration makes it ideal for slimming
- **Guarana:** Currently, Guarana (Paullinia cupana) is the richest known source of caffeine. Caffeine is particularly interesting for its anti-cellulite effect and slimming properties
- **Laminaria:** Brown algae genus (oarweed); rich in mineral salts, vitamins and trace elements; remineralising, firming and toning
- **Fucus vesiculosus:** In traditional medicine, brown algae genus (bladderwrack) is used for its slimming effect
- **Horsetail:** Thanks to being rich in silicic acid (60-80%), horsetail has remineralising and firming properties
- **Ivy:** The ivy saponins have a draining effect and reduce cellulite
- **Lemon:** The essential oil from the peel of the fruit, which is native to the entire Mediterranean region, has a fine, fruity scent and a holistic mood-lifting and activating effect
- **Grapefruit:** The essential oil of grapefruit (Citrus paradisi) smells fresh and slightly fruity; on the skin, grapefruit oil promotes circulation, stimulates skin metabolism and helps to reduce cellulite
- **Bitter orange:** Essential oil from Citrus aurantium, a mandarin and grapefruit cross; fresh scent of citrus leaves; promotes blood circulation, stimulates skin metabolism and helps reduce cellulite
