JANSSEN COSMETICS

OILY SKIN

- Skin blemishes are targeted and prevented
- Loosens excess skin flakes
- Loosens fixed comedones until they are completely removed
- Antibacterial and anti-inflammatory
- Moisturising
- Soothing

Purifying BHA Serum

CLARIFYING SERUM FOR BLEMISHED SKIN

Purifying BHA Serum is a highly effective active ingredient concentrate for local application and targeted combating of skin blemishes. The lightweight formula contains salicylic acid to loosen superficial skin flakes, soften comedones and reduce inflammation. At the same time, the innovative Equal Refining Complex made of Enantia chlorantha and oleanolic acid reduces the shine of the skin and refines the pores. A sugar-based hydration booster in combination with glycerine significantly increases the moisture content of the skin. Aloe vera soothes skin while hyaluronic acid plumps fine lines of dryness.

Ideally, the serum is combined with the Light Mattifying Cream or Regulating Retinol Cream to significantly improve the complexion of blemished skin in no time at all.

Application at home

Apply locally if needed, i.e. directly to oily skin areas and existing or emerging skin blemishes, massage in lightly and leave on for a few minutes. Then use Light Mattifying Cream or Regulating Retinol Cream for further care.

Heads up:

pH value of 4.8

ACTIVE INGREDIENTS

- **Equal-Refining Complex:** The combination of oleanolic acid and the extract from the bark of Enantia Chlorantha slows down sebocyte growth. The sebaceous glands are put into a dormant state, reducing greasy shine by -21.7% and pore size by -16% after 28 days
- **Salicylic acid:** Naturally occurring active ingredient with antimicrobial and anti-inflammatory effects; loosens superficial skin flakes, softens comedones (keratolytic)
- **Sugar-based moisture booster:** Intensively moisturises; strengthens the skin barrier, reduces wrinkles caused by dryness and skin flaking
- **Aloe vera extract:** Rich in polysaccharides, enzymes, essential fatty acids, vitamins, minerals and many other active substances; moisturises and soothes
- **Hyaluronic acid (long-chain):** Forms a water-binding film on the skin surface and, protecting the skin from drying out. Fills out fine lines and wrinkles
